

HAWKEYE INTERNATIONAL

ASSEMBLY INSTRUCTIONS FOR THE AQUAWAVE SAVE THESE INSTRUCTIONS

To Get Started

Note: Numbers listed in illustration correspond to steps listed here.

- 1) Remove aquarium from packaging.
- 2) Rinse the tank with warm water - no soap.
- 3) Connect both ends of the 14" portion of airline tubing to the underside of the filter. Make sure the small holes in the airline tube are facing up when filter plate is in the tank. This will help the bubble flow and filtration.
- 4) Connect the long tubing to the top corner of the filter plate.
- 5) Feed the tubing through the top trim and connect to the air pump.
- 6) Place the pump above the tank. If the pump is going to be placed below the water line a check valve must be installed to prevent water from siphoning into the air pump.
- 7) Place top trim on tank body.
- 8) Place sky lens on top trim.
- 9) Add rocks and decorations.
- 10) See "Aquarium Setup Tips" section for more information on how to successfully maintain an aquarium.
- 11) See IMPORTANT SAFETY INSTRUCTIONS section before operating this unit.
- 12) Add water to fill line and allow to circulate for at least 48 hours before adding fish.
- 13) Follow instructions on de-chlorinator to treat water.
